## EDUCATION

Bachelor of Technology (Computer Science in Cyber Security) | VTU | BKIT Bhalki | 7.86 CGPA

2023-2027

## EXPERIENCE

### CYBERSATHI – AI-Powered Blockchain Security & Threat Intelligence Platform (Academic Project)

Self Project | January 2026 – Present

- Developed a blockchain security platform for threat monitoring, wallet intelligence, validator analysis, node health monitoring, and incident investigation.
- Implemented AI-assisted risk scoring, anomaly analysis, threat-pressure monitoring, and explainable security indicators for blockchain activity.
- Built modules for attack investigation, incident response, blockchain exploration, security assessment, and AI-powered security assistance.
- **Technologies:** HTML, CSS, JavaScript, Python, Blockchain, AI/ML, Cybersecurity

### TRINETRA AI – AI-Powered Campus Safety & Risk Intelligence Platform

Description:

- Developed an AI-assisted campus safety platform for incident monitoring, security telemetry, risk intelligence, and restricted-zone management.
- Implemented incident analysis, severity and risk assessment, evidence processing, and database-backed security records.
- Built a centralized Campus Security Command Center with security mapping, incident management, AI analysis, and local-first processing.
- **Technologies:** HTML, CSS, JavaScript, Python, AI/ML, SQLite, Cybersecurity

## SKILLS

**Programming:** Python, C++, Java, C, Data Structures & Algorithms, DBMS, Bash

**Cybersecurity:** Network Security, Threat Analysis, VAPT, Analysis, Risk Assessment, Ethical Hacking

**Security Operations:** SIEM, SOC Fundamentals, Log Analysis, Threat Intelligence, Security Alert Triage

**Cloud & Web Security:** Cloud Security, Microsoft Azure, OWASP Fundamentals

**Blockchain:** Blockchain Fundamentals, Smart Contract Concepts, Decentralized Systems

**Tools & Platforms:** Linux, Windows, GitHub, VS Code

## PROJECTS

---

### CYBERRAKSHAK – AI-Powered Security Operations & Threat Assessment Platform

**Technologies:**

HTML, CSS, JavaScript, Python, AI/ML, Cybersecurity

**Description:**

- Developed an AI-assisted security platform for security posture monitoring, vulnerability assessment, risk scoring, and threat analysis.
- Implemented asset monitoring, attack-path analysis, security findings, risk classification, and automated security scanning.
- Integrated an AI Security Copilot for analyzing security findings, asset exposure, attack paths, and remediation guidance.

### CYBERTECH – AI-Driven Cloud Cyber Defence & Incident Response Platform

**Technologies:**

HTML, CSS, JavaScript, Python, AI/ML, Cloud Security, Cybersecurity

**Description:**

- Developed an AI-driven cloud security platform for threat monitoring, risk assessment, behavioural analysis, and security posture management.
- Implemented IP investigation, vulnerability scanning, incident-response workflows, compliance auditing, and access-policy management.
- Built an Attack Simulation Lab and AI Cyber Defence Advisor with threat classification, risk scoring, and response recommendations.

## CERTIFICATION

---

**Cybersecurity & Professional Training:**

- Cybersecurity Analyst Job Simulation — Forage
- Cybersecurity Job Simulation — Forage
- Cyber Security Assessment Certification — LearnTube.ai
- Advanced Software Engineering Job Simulation — Forage
- Solutions Architecture Job Simulation — Forage
- Cybersecurity Roadmap 2025: Start Your Journey to Become a Cyber Pro — SkillEcted
- Cyber Security Workshop — TheTechUnique Academy
- Python Programming Fundamentals — Microsoft
- Git & GitHub Version Control — Microsoft
- Blockchain Technology Fundamentals — Microsoft
- Linux System Administration & Fundamentals — Microsoft
- Cyber Security Fundamentals — Microsoft
